

Attention Apple Mac users. You may find that when you click on a web link and then subsequently click back to our Website that the links on the page will not function. This is due to a setting in your browser that may be disabled. To rectify this please follow the following steps.

Step One.

Ensure that Safari is open.

Step Two.

Click on the Safari option on the top left of your screen.

Step Three.

Select the **preferences** option.

Step Four.

Select the **security** option.

Step Five

Ensure your settings are the **same** as the below screen shot.

Now Quit safari and open it again to enable the changes.
